

Meet Your Diverse Requirements Accurately with SIMOLIFE® Sheet for Orthotics and Prosthetics

The most complete range of O&P sheet from one worldwide manufacturer—in the polymers, gauges, blank sizes and colors you need

Developed in Germany by SIMONA AG, SIMOLIFE® sheet is now available through a new SIMONA AMERICA® manufacturing and logistics center in Archbald, Pennsylvania, providing you with 10 important advantages:

1. PETG, PP Homopolymer and Copolymer, High- and Low-Density PE and EVA in Flex and Superflex grades
2. Low, consistent shrinkage for repeatable results
3. Low cost and fast deliveries
4. Wide Modulus of Elasticity Range: 2,700 to 235,000 PSI (18.6 to 1620.3 Mpa)
5. Broad range of gauges
6. Sizes from 16 in. (406 mm) square to 48 x 96 in. (1219 x 2438 mm)
7. Certified resin quality and process controls to O&P standards
8. Transparent, Natural, Flesh, Black and White colors
9. FDA compliance
10. Distribution partners specializing in Orthotics and Prosthetics

SIMONA® offers SIMOLIFE® Sheet for Orthotics and Prosthetics in seven grades, numerous gauges and five colors

Compare SIMOLIFE® sheet side-by-side with your current sheet at no cost or obligation.
