Certification
Board**

'Together, we can assure a strong and prosperous future for our profession

With an uncertain health care environment, continuing changes in Medicare's payment policies, and competition from less qualified professionals, signs of concern for O&P are here. To secure a better future for our patients and ourselves, the O&P profession needs the strength, voice and recognition of a single certification board, united by one standard of excellence.

'Together we are meeting the challenges of tomorrow...starting today

The American Board for Certification in Orthotics and Prosthetics (ABC) and the Board for Orthotist/Prosthetist Certification (BOC) have entered into formal negotiations for the purpose of unification. Both organizations believe that the long term benefits to unification are overwhelmingly positive. Unification gives the profession the opportunity to achieve its primary goal: The betterment of O&P patient care.
