

Connect with the Becker Stance Control Team

Stance Control KAFO's are the latest technology to come to our field. Whatever your experience with stance control happens to be, we have put together a team to help you every step of the way. Our program offers educational in-services at your facility with one of our clinical education specialists, or online in-services via **webex** to help you get started. We can also offer additional support by sending you one of our new Netbooks with a built in webcam. You can be linked through **skype** to one of our educators for real-time video calls to provide advice on evaluations, component selection, fitting and problem solving.

Becker Orthopedic has the largest selection of stance control componentry available, including our unique evaluation tool, the PreStride™. At Becker Orthopedic we want to help you provide the best outcomes for your patients in any way we can.

Get started today by calling our stance control coordinator, Lori Costanzo.
