

NeuroProsthetics

A New Frontier O&P Technology

Wearable Therapy™
for management of
chronic pain

freeSTEP™
physiological walking
for foot drop

NeuroProsthetics
for restoration of
task-specific function

Clinical Training

Our clinical training course will teach you the principles of NeuroProsthetics and FES Technology so you can design and customize systems for alleviation of pain and rehabilitation of the neuro patient.

Bioflex's NeuroProsthetic technology can be configured for any anatomical region of the body and customized to meet individual requirements, including pediatrics.
