

Innovative solutions for pediatric bracing

Introducing new products from Cascade Dafo!

The **Fast Fit® Bug™** is our new low-profile shoe insert designed to control mild to moderate pronation with an optimal amount of support and comfort, yet minimal volume in the shoe. And the **JumpStart® Softback™** is a prefabricated AFO providing lightweight, comfortable control of mild to moderate toe walking and knee hyperextension.

Little feet grow fast, and Fast Fit products are a quick, effective, and affordable alternative to custom bracing, backed by our full 90-day warranty.
