**New Short Adjustable Pylon**

The Adjustable Pylon from Kinetic Revolutions features precise height and rotation adjustments without removing the socket or foot. The adjustable pylon significantly reduces patient appointment time, saving an average of 15-20 minutes per visit! The adjustable pylon also makes off-site visits more efficient and therapist-friendly. Available in two extension ranges: Standard (95-130mm) and new Short (73-95mm).

**Hybrid Knee from Nabtesco**

A highly accurate yielding function is embodied in the new Hybrid Knee from Nabtesco. To the controlled power of the hydraulic system, soft pneumatic control has been added. This fusion of microprocessor controlled technologies gives you a hybrid system that prevents unnerving buckling at the knee, and enables easier walking in greater comfort. With pyramid (#8111-2700296-01) or threaded head (#8111-2700296-02)

**Matrix Spiral from Trulife**

Trulife introduces the latest addition to the Matrix family of carbon composite AFOs. The Matrix Spiral provides a smooth, dynamic transition from heel strike to toe off and effective and consistent energy return. The easy to fit Matrix Spiral features flexible heel and toe plates and a lateral spiral design which passes anterior to the lateral maleolus. Recommended for the treatment of drop foot, peroneal palsy, and CVA. Suitable for bilateral use. Left and right models in three sizes. One year warranty on hardware; 90 days on soft goods. Replacement pads and strap available. #FH280

**DARCO PegAssist™ Insole System**

The DARCO PegAssist™ Insole System features a multi-indication removable-peg chassis allowing for localized off-loading of wounds and ulcerations of the foot, reducing pressure by as much as 60% while allowing patient to remain ambulatory. Poron® cover eliminates the incidence of ring edema and edge abrasion. Stabilizer board prevents adjacent pegs from collapsing. #PTQ (for Square Toe Med-Surge Shoe); #PQ (for other DARCO Square Toe Shoes and Walkers). **Save 10% through 2/29.**

**Minerva Orthosis**

The Minerva Orthosis incorporates the best design features of past proven systems with today's materials for a functional, comprehensive, all adjustable, and non-invasive cervical thoracic immobilization system. The unique aluminum multi-post yoked anterior adjustment system allows complete linear adjustability for flexion, extension, neutral positioning, and immobilization with unique adjustment pull tabs. The Y-chin support members allow width and narrowing customization for rotational control and patient comfort. The ergonomic molded posterior occipital component encompasses an aluminum adjustable spine element, allowing the practitioner full customization and total contact conformity of the cervical arch contours. MRI compatible. From Cybertech Medical. Code L0200 approved. #MCTO-SG

**New Trautman Sand Drum and Sleeve**

The new Trautman Pneumatic Sand Drum (#224100) from Fillauer fits all Trautman carvers, measures 3.5" x 5" and is inflated to hold the sanding sleeve tightly in place or to make an adjustable sanding surface. Sand sleeves are available in 120, 80 and 36 grit. The Coneiak Polishing Sleeve (#225470) polishes thermoplastic materials quickly and efficiently. The wide surface greatly reduces heat buildup and is longer lasting. Adapters to fit other brand equipment available.

### New Transfer Papers

"Hearts" #110P26/06 (pictured left) and "Black & White Hearts" #110P26/07 (pictured as background below at 10% density) are two of ten new patterns available from JMS Plastics. Sheet size measures 1,600 x 1,000 millimeters.

### Alpha® Silicone Liner

WillowWood's new platinum-cured silicone liner is medical grade and designed for a comfortable fit. The silicone features a unique blend of Vitamin E and skin conditioners for a non-greasy and non-tacky surface. The liner's one-way stretch Select fabric controls pistoning without using a distal matrix. Flared shape contours to a limb's surface for an intimate fit and a flexible knee panel provides enhanced knee flexion. Retrofits with thermoplastic elastomer liners with a progressive gel style. Available in locking (#S352) and cushion (#S350) styles.

### i-limb™ Ultra

i-limb™ ultra is the latest generation of the i-limb™, the world's first powered prosthetic hand with five articulating fingers. Touch Bionics' new i-limb™ ultra gives the user an adjustable grip that can be up to 25% stronger than the original i-limb™. i-limb™ ultra is the only prosthetic hand with the ability to gradually increase the strength of its grip on an object.

Features include unique pulsing grip strength—variable and selectable per digit; durable aluminum chassis, manually rotatable thumb and wrist; five available control strategies—two dual-site and three single-site; and automatic hand modes including index point, lateral grip, natural hand position, four precision pinch options and two thumb parking modes.

The i-limb™ ultra is available in two low-profile sizes—regular and small, and two colors—natural and black. Various cosmesis options are also available, including i-limb™ skin, dynamic flex covering and livingskin custom made covering.

The i-limb™ ultra comes with Touch Bionics' biosim software to connect via Bluetooth® to the i-limb™ ultra hand while the patient is actively using it, allowing selection of features, assessment, usage data and more.

The i-limb™ ultra hand system includes hand, biosim software, battery kit, wrist assembly, two i-limb skin active coverings, one i-limb skin natural covering and AC battery charger. 2-year standard warranty.

### ProAdvantage® Lock Now Improved

The ProAdvantage® IRS-600-AK now features a permanent stainless steel ring secured around the pin hole of the body to increase overall durability and a cushion/sealing washer inlaid around the pin to create an airtight seal. Washers are available for purchase separately.

### New Hugger Top Soft-Sock®

Hugger Top Soft-Sock® from Knit-Rite provides a more tailored fit, reduces rolling and bunching and helps maintain sock placement. It features a new patented hemispherically knit three-dimensional distal shape. The new distal end shape provides improved fitting qualities and comfort over the traditional flat knit envelope shape of prosthetic socks.

### Ottobock Available Through COS

Cascade Orthopedic Supply is proud to announce the addition of its newest supplier: Ottobock, the world's largest manufacturer and distributor of orthotic and prosthetic components. Ottobock makes it their mission to increase the quality of life for people with disabilities by offering up-to-date, innovative, and high-quality prosthetic devices. In order to meet all the fitting demands for amputations of upper and lower extremities and to facilitate the best possible individual solution for every user and every prosthetic fitting, Ottobock offers many different models of prosthetic feet, adapters, liners, knee and hip joints as well as prosthetic accessories. Cascade will be carrying select Ottobock components, knees and hip joints, cosmetic covers, and fabricating supplies.
