This list is provided as a courtesy, and while every attempt was made to list all prosthetic liner manufacturers, it may not be comprehensive. If you are a prosthetic liner manufacturer and would like your information added to our list online, e-mail: editor@opedge.com

Juan Cordero, manufacturing supervisor at Evolution Liners, holds one of the company’s liners. Photograph courtesy of Evolution Liners.

Two knees in one — The medipro OFM2 provides versatility by combining a manual lock option with a friction brake.

- Converts between friction brake and manual lock with a single screw adjustment
- Customizable for mobility increase or decrease within K1 and K2 range
- Lightweight (425 grams)
- Internal extension-assist eliminates hassle of traditional external springs
- Friction brake releases before un-weighting for smoother ambulation
- Applicable for K1 and K2 amputees weighing up to 220 lbs
