

Innovations and Trends. International Contacts.

ORTHOPÄDIE + REHA-TECHNIK in Leipzig is the sector's most important event worldwide. The International Trade Show and World Congress in May 2012 will provide a comprehensive overview of the market. You will be able to find out about new technological developments and trends, establish international contacts and keep up to speed in the world-class events for further professional development.

The congress languages are English and German with simultaneous translations.

The programme of the World Congress will include the following keynote talks:

- ▶ Klaus-Jürgen Lotz, Germany
"Lecture during the Opening Ceremony"
- ▶ David Condie, Great Britain
"Cerebral palsy and its treatment"
- ▶ Hon.-Prof. Dr. Dieter Lüttje, Germany
"The active elderly"
- ▶ Bengt Söderberg, Sweden
"Expectations on lower limb prosthetics"
- ▶ Michael Schäfer, Germany
"Function – arm prosthetics in focus"
- ▶ Prim. Univ.-Prof. Dr. Franz Grill, Austria
"The pediatric foot"
- ▶ Bengt Engström, Sweden
"Functional seating for wheelchair users? The correct choice for the future"

Symposia:

- ▶ Cerebral palsy in children
- ▶ P&O treatment in paralysed patients
- ▶ The severely impaired arm after stroke – a sore spot in rehabilitation
- ▶ What can prosthetics, orthotics and orthopaedic footwear technology provide for the elderly patient?
- ▶ Gonarthrosis
- ▶ Foot changes in cases of diabetes mellitus
- ▶ Recent developments in ankle disarticulation and partial foot prosthetics
- ▶ Interdisciplinary treatment of rheumatism – a complex disease requires complex approaches to treatment

- ▶ Current education concepts – an international overview
- ▶ Upper extremity prosthetics – hand and lower arm
- ▶ Idiopathic scoliosis
- ▶ Hip dysplasia in children
- ▶ Upper extremity prosthetics – proximal and upper arm
- ▶ Common injuries and disorders in running
