Quality for life

The new Skeo silicone liner family

A better connection starts here

Choose a liner that works with your patient rather than against them. Designed from the inside out, Skeo liners feature a textured inner surface for enhanced feel and connection.

Each liner includes an internal matrix to reduce pistoning that can strain a patient's limb. Patients will also appreciate the slick outer surface that makes donning/doffing easier. Choose from a variety of options that include SkinGuard anti-bacterial protection, an anatomically pre-flexed liner, or a clear liner to help evaluate limb health. Our newest option is the 6Y87 Skeo 3D TF!

Call your Sales Representative at 800 328 4058 to give your patients a better connection with the new Skeo silicone liner family.
