

Mobility at a Higher Level

- Interactive spring system for smooth roll-over
- Side-specific forefoot shape for extending the effective foot length
- Split forefoot for stability and control on uneven surfaces
- Heel stiffness wedges allow simple adaptation to the user's needs
- Weight range up to 330 lbs.
- Slim or normal footshells available, both with sandal toe
- Ideal for K3 — K4 users

NEW! 1C60 Triton Foot from Otto Bock

From the global leader in prosthetic feet comes the new 1C60 Triton — bringing your patients independence and mobility from a foot that's ready for all situations.

Otto Bock's new Triton is a winner in higher activities and everyday use, including a jog along the Great Salt Lake. Based on the innovative Trias design, the Triton quickly and simply adapts to individual needs, providing a remarkably high level of mobility for your patients.

Get them on to their next adventure with the 1C60 Triton. Contact your sales representative at 800.328.4058.

See the new Triton in action at www.yourlife-youradventure.com.
