

**New!**

# LSO and TLSO from Restorative Care of America, Inc.

The new **LSO** and **TLSO** by RCAI feature thermo-plastic Kydex® anterior and posterior panels, with polymer stays in lateral pockets. The back panels, available in Short, Average and Tall heights, have a surgical opening to relieve pressure at the incision site. The detachable strapping system allows for an individualized fit, while the “D” ring pull front closure promotes easy application. The washable liners of the TLSO and LSO are made of a “wickable” material that keeps moisture away from the skin, promoting patient comfort and compliance.
