Tim's no longer a soccer standout

Life's not easy with Scheuermann's Kyphosis, especially if you're a 13-year-old who loves soccer. Tim's orthotist knew that a custom-fabricated TLSO with sternal shield made by Spinal Technology would help him stand straight & tall off the field. He simply doffs his brace before practice so he can get back to what he enjoys most: being active and developing his soccer skills with his teammates.

Tim's orthotist has always relied on Spinal Technology's team of orthotists, CSRs, mold & finish technicians, and

experts in foam & plastics. We're the fabrication experts that can help you make a difference for patients with special requirements.

Find out for yourself. Call to place an order, and we'll show you how Spinal Technology can help you achieve better spinal orthotic results for your patients.
