

One size fits all? You wish.

As a skilled orthotist, you know better. You can't expect off-the-shelf spinal braces to fit as precisely, or be as effective as custom crafted orthoses. But you have a busy schedule, and custom work takes time.

Spinal Technology helps orthotists do what they do best, by doing what we do best: using advanced technology and highly skilled hands to make custom spinal orthoses that fit and function according to your specifications. It's the smart choice to cut inventory, increase profits, eliminate donning problems... and see more patients in a day.

We have a passion for perfect fit.

Find out for yourself.

Call or drop us an e-mail, and we'll send you our "five fitting principles" guide to better orthotic results.
