

Life's journey begins with
the first step.

For those with
foot drop, the path just
became a whole lot easier.

WalkAide, from Innovative Neurotronics, has heralded a bright new day in the treatment of foot drop – a day in which simplicity, freedom and functionally attractive design are delivered in an affordable, easy-to-use device.

The 2009 Training Course focuses on the recently released **WalkAnalyst Version 2.3 Technical & Marketing Package**. This intuitive, user friendly software upgrade simplifies data collection and device programming of the WalkAide to ease integration into your clinical practice while expanding the patient treatment populations.

MEDICARE CODE - Reimbursement Procedures, protocols, forms and available assistance are discussed at length regarding the new HCPCS code (E0770) in this course.

Please call your SPS Regional Sales Manager to register for one of the 2009 WalkAide Training Courses near you or register online at www.spsco.com/walkaide.html. Course size is limited to 20 participants.
