

New Pricing.

reduced up to
50%

We're now offering the same high quality adapters you've come to expect from Seattle Systems at much lower costs. So, as of today, all of our adapters have been reduced from 20% to 50%. And that's a big deal, as well as big savings for you.

Aerospace quality adapters,

Proven Engineering.

Seattle Systems modular components are subjected to rigorous ISO 10328 test standards to substantiate and ensure patient safety over time. Plus, our modular adapters are tested in a manner that simulates running across the United States at an eight-minute mile pace. While your patients may not currently be that active, we simply want to ensure that our products aren't the limiting factor.

Hair Thin Tolerances .005"

All of our modular components are manufactured with precision using computer numerically controlled machinery. We maintain all tolerances to within .005". This precision is maintained throughout the entire product line from pediatric to 366-pound adults.

Quality Guaranteed.

Along with each component we make comes peace of mind. Because Seattle Systems operates under the ISO 13485 quality system standard. It's just one more reason to choose our adapters.

Corrosion Resistant Dacromet® Coating.

Seattle Systems applies Dacromet® coating to all set screws. This attention to detail drastically reduces screw corrosion, binding and galling. Combined with the same titanium and aluminum used in the space shuttle, space station, the hull of submarines and airplanes, you're assured a lightweight, quality product.

at prices that are down to earth.

SEATTLE SYSTEMS

Restoring Everyday Living.™

Made in the USA.

Although the Seattle Systems' commitment to serving customer needs and solving their problems is what has given this company a reputation for excellence worldwide, all of our modular adapters are made right here — in the USA.

Dacromet® is a registered trademark of Metal Coating International.
